It's chemical-free, hypo-allergenic, and won't lube like other synthetic fibers. Onyx is the purest synthetic fiber ever made. Synthetic or human hair Human hair is made up of one of the strongest natural fibers known to man. But human hair is not designed to look like hair. Synthetic hair is a great alternative for people who are allergic to natural hair, are going through a balding process, or just prefer a more "hands off" hair care experience. Discover The Real Beauty Of Onyx "Because there are no laws in hair, I spent years finding the right material to make the most gorgeous hair. I am thrilled that I found Onyx."Quality assurance programs: the quality assurance program of the American Society for Reproductive Medicine. The Quality Assurance (QA) program of the American Society for Reproductive Medicine (ASRM) is based on a dedicated QA committee composed of core members drawn from the Section on Reproductive Endocrinology and Infertility and the Sections on Fertility Preservation and Male Reproduction and Obstetrics/Gynecology. The committee conducts inspections of the facilities and services available to patients in more than 50 private and academic clinical centers and in clinical units throughout the United States. Services that are covered by the ASRM QA program include infertile couples and their male partners, female infertility, female sterilization, in vitro fertilization, and frozen embryo banking. The focus of the QA program is on patient safety and quality assurance of the clinical care. The QA program is also an opportunity for the ASRM and its members to promote and enhance the QA concept in all areas of fertility medicine. The QA program is voluntary, and there are no financial costs to patients, private
